Upload Image to the container Registry

Date	15 November 2022
Team ID	PNT2022TMID46432
Project Name	Skills/Job Recommender Application

Push the image to the IBM Cloud Registry

- 1. From your account dashboard, go to IBM Cloud Kubernetes Service.
- 2. From the left navigation menu, select Private Repositories.

ibmcloud plugin install container-registry -r "IBM Cloud"

3. Install the Container Registry plug-in.

4.

- 5. Log in to your IBM Cloud account.
- 6. ibmcloud login -a <cloud_foundary_end_point_for_the_region>
- 7. Name and create your namespace. Use this namespace for the rest of the Quick Start.

8. ibmcloud cr namespace-add <namespace>

9.

Log youribmcloud cr login

local Docker daemon into the IBM Cloud Container Registry.

10

11.

docker tag <image_name> <region_url>/<namespace>/<image_name>:<tag>

Choose a repository and tag by which you can identify the image.

12.

13.

Push docker push <region_url>/<namespace>/<image_name>:<tag>

the image.

14.

- 15. Verify that your image is in your private registry.
- 16. ibmcloud cr image-list
